Policy on Determining Compensation Amounts and Calculation Methods	Established
--	-------------

Disclosure of Policy on Determining Compensation Amounts and Calculation Methods

- 1) Matters concerning the Company's determination policy on details of individual compensation and other related matters for Directors and Auditors

The Company, through the Nomination and Compensation Committee, has decided the following determination policy on the details of individual Directors' compensation, etc. This policy has been established by the Board of Directors in the Officers' Compensation Rules.

The Company's determination policy on the details of individual Auditors' compensation, etc. has also been established by the Board of Directors in the Officers' Compensation Rules.

Compensation for individual Auditors is determined through discussion between Auditors, within the total compensation limit resolved by the General Shareholders Meeting.

- 2) Summary of the determination policy

- i. Basic policy

The basic policy for Director's compensation is to link the compensation system with the benefits of shareholders in order to make the system fully functional as an incentive to pursue the sustainable improvement of corporate value, and to determine the individual Director's compensation at an appropriate level according to his/her responsibilities.

Specifically, Directors' compensation consists of "basic compensation for officers" as fixed compensation, and "bonuses for officers (monetary/stock)" as performance-linked compensation. Regarding Outside Directors, who assume the responsibility of oversight, only "basic compensation for officers" is paid in light of their duties.

- ii. Policy concerning the determination of the amounts of individual Directors' basic compensation, etc. (monetary compensation) (including the policy concerning the determination of the timing and conditions for the payment of compensation, etc.)

Basic compensation for Directors of the Company is fixed monthly compensation, in an amount deliberated by the Nomination and Compensation Committee and determined by the Board of Directors.

- iii. Policy concerning the determination of the details and amount or method used to calculate the quantity of performance-linked compensation (including the policy concerning the determination of the timing and conditions for the payment of compensation, etc.)

The benchmark for the payment of performance-linked compensation is the ability of the Company to pay dividends, which are calculated based on separately-established allocation standards for profit, using profit attributable to owners of parent. The performance benchmark is selected to raise awareness of the performance improvement for each fiscal year, contribute to the improvement of corporate value, and share benefits with all stakeholders.

Performance-linked compensation is paid as a bonus at a predesignated time each year, in an amount calculated in accordance with performance for each fiscal year.

The target of the benchmark for the payment of performance-linked compensation for the current fiscal year (98th fiscal year) was based on payment of dividends with approximately 30% of a consolidated payout ratio. Dividends from surplus were not paid as loss attributable to owners of parent of 1,074 million yen was posted. Accordingly, bonuses for officers were not paid to six Directors (excluding Outside Directors) in accordance with the policy on Directors' compensation.
